EDUCATION

Diploma In Computer Engineering

Government Polytechnic

08/2016 - 06/2019

7.29 CGPA

Bachelor of Technology In Computer Science Engineering

Charotar University of Science and Technology

08/2019 - Present

7.39 CGPA

PROJECTS

Cryptotic(Web Development)

- We've worked on cryptographic method on website and user can convert their simple text to encrypted text and also they can convert encrypted text to decrypt too. We have used total of 5 different algorithms for data encryption and decryption.

Smart Street Light Controller(IOT)

- IOT(Internet Of Things) based project that automatically turn ON lights when the vehicle is passing by the way and it automatically switches OFF lights whenever the vehicle is passed away, meanwhile Street lights will work automatically according to motion. we've added feature like lights can be accessed remotely in conditions of emergency can be activated/deactivated and this system will automatically be deactivated in day light because there is no need of light in day so this system is all about reducing/saving the electricity

WORK EXPERIENCE

Internship

Charusat University

08/2020 - 10/2020

Anand, India

Tasks

- Internship For Web Development

Internship

Web World Developing

06/2021 - 07/2021

Jamnagar, India

Task

- Internship For App Developing

PROGRAMMING LANGUAGES

c/c++
